

# Clients can search through 100s of transcripts online quickly

With RB Web’s Repository Search plug-in, clients can search through 100s of transcripts, exhibits, etc. in seconds online. They can search through all the files in a case or their entire repository at once.

## Full-text search for online repository plug-in

You build indexes of clients’ files in the RB8 Repository so clients search an index, not the actual files, online. This saves them a significant amount of time over non-indexed searches.

They can search three ways:

- All of the words
- Any of the words
- The exact phrase

When they locate the right file, they click the download button for a copy.

## RB Web’s Repository Search plug-in reads the following file formats:

- PDF (text portion)
  - MS Word
  - Excel
  - PowerPoint
  - RTF
  - HTML
  - all text types including ASCII
- (eTranscript PTX is not text based, so it is not supported.)*

## Details about RB Web’s Repository Search plug-in:

- Requires RB8 and RB Web.
- Is available for \$50/month, cancel anytime.

Searched words are highlighted in the results to make it easier for your clients to locate the correct file.
